

Friday 18.11.2022

Had a call with Hannu about the direction of the project. Read a paper called "A Modified Hausdorff Distance for Object Matching"

Saturday 19.11.2022

Started anew on the project since (though i kept the testing stuff). Started implementation off the knn algorithm currently it only checks direct matches of position.

I regrettably did not have much time to work on this project this week so i will have to pick up the slack next week
