

**Wednesday 2.11.2022:**

Went to the starting lecture where general info about the course was given. Started to think about what project to pick.

**Friday 4.11.2022:**

Did some research about Knn algorithms to see if it was a suitable topic. Learned the basic principles of it.

**Saturday 5.11.2022:**

Wrote the specification document for the project. Created a git repository for it as well. Next up i will start with making the base functionalities such as loading test data.
